# PROFILE

---

An all-round graphic designer, who has experience of delivering creative, graphic concepts for a wide range of fields. I am detail-oriented, deadline driven and has immense creative flair. I has strong visual sense and as a true professional not only gets excited about new ideas but also knows how to run with them. My key strengths lie in my ability to create graphics that communicate core values and business objectives. As a committed team player, I will work well within a wider content creation environment and is someone who will always be there to contribute creative ideas to a project.

**Zolly**  
THE WORLD'S MOST CONVENIENT ELECTRIC BIKE

- > CRUISE AROUND TOWN
- > TAKE ZOLLY TO THE PARK
- > STORE ON YOUR RV OR BOAT
- > RIDE AROUND CAMPUS

AROUND CAMPUS,  
TOWN OR WHEREVER

The Zolly was created for people who love freedom and having fun.

www.zollybike.com

It's not a bicycle or scooter, it's the **MEGA-AWESOME Zolly ebike!**

The all electric, eco-friendly design of the Zolly allows you to cruise at speeds up to 18 mph. This means that it can be ridden in streets, sidewalks just like a regular bike.

As far as the battery goes you can ride up to 20 miles on one charge and recharge the battery in 2-3 hours (roughly as fast as a cell phone). With an LG brand name battery you know your bike is safe and will perform well.

The lightweight, aluminum frame can be folded down to a portable size that is perfect to store in the back of an RV, boat or trunk of a car.

With the high-tech LCD screen you can monitor your speed battery level, distance traveled and other fun statistics. We even put cruise control and automatic lights on it!

The Zolly comes with a built in USB port to charge your phone while on the go. Finally never worry about lugging around a bulky charger, the Zolly charger is built right into the frame!
